**SPEC SHEET**

**Hot Cold Dual Operation Cabinet**

**Specifications**

Top is 14 gauge 304 stainless steel #4 finish bound with (4) 10/32 stainless steel screws flush at each end. Front and back edges are turned down 102° and turned back 90° eliminating the gap between the top and the base of the cabinet. The ends are turned down 90° flush with cabinet base, this eliminates any open space between G.A. Systems cabinets. No exposed screws on the front or back of cabinet.

Body of cabinet is fabricated of 1” square 18 gauge stainless steel and cold rolled tubing to form the top and bottom frames. Each is welded to 1-1/2” square 18 gauge stainless steel corner posts. Each corner post is filled with a urethane foam type insulation and capped. All joints are welded with all exposed welds being ground and polished. 20 gauge galvanized body panels are welded to tubing super structure. An inner liner between outer walls and interior food wells are constructed of 22 gauge stainless steel with 2B finish.

Wells are 6” deep and constructed of 18 gauge stainless steel. Wells are manufactured with a continuous seamless design with all corners coved for easy cleaning. Wells are fully insulated with a urethane foam for energy savings and efficiency and there are no screws used in the construction of the wells.

Each well has a 3-position control; hot, cold, and off, in addition to an infinite control to adjust the heating temperature when in the “hot” position. Designed to heat without water and requires no floor drain.

Front removable access panel is 18 gauge 304 stainless steel #4 finish and recessed for controls. Easily removable screws on front panel allow for easy removal and convenience in servicing the unit. Louver panels on compressor side of front is 304 stainless steel #4 finish.

Exterior front, back and ends are trimmed with 22 gauge stainless steel #4 finish trim to accept laminated color panels. Lamine is applied to 1/8” board for additional strength.

Bottom is fully enclosed. There is a 3-3/4” clearance from the bottom of the cabinet to the floor. Plate type 3” swivel non-marking casters with brakes. Cabinet heights are ADA compliant.

Electrical outlet must not exceed 4 inches in height including plug.

**Options**

- Cord and plug; specify length
- Hard wiring
- Drains with manifold
- Adapter bar set
- Compressor location on right
- Solid Surface Top (in lieu of stainless steel top)

**Accessories**

- Tray Slide Stainless Steel
- Tray Slide Solid Surface Material
- Double Sided Sneeze Guard Glass
- Double Sided Sneeze Guard Acrylic
- Single Sided Sneeze Guard Glass
- Single Sided Sneeze Guard Acrylic
- Single Sided Self Serving Sneeze Guard Acrylic
- Merchandise Display Rack Single
- Merchandise Display Rack Half
- Display Shelf Double (stainless steel)
- Single Display Shelf (glass)
- Cash Shelf 15”
- Cash Shelf 20”
- Cash Shelf 24”
- Tray Shelf 12”
- Tray Shelf 15”
- Tray Shelf 18”
- Toe Kick
- Premium High Pressure Laminate
- Graphic Panels Stand-off
- Graphic Vinyl Decals

**Refrigerated system; cabinets with two wells utilize a 1/3 HP compressor and cabinets with 3, 4 and 5 wells utilize a 1/2 HP compressor all operating on 404A refrigerant. The temperature is preset at the factory. Heating system; each well has a 1250 watt heat source and an infinite control to adjust heating temperature when in the 3-position switch is in “hot” position.**

Note: Do not position cabinet with louvered panel against wall or other equipment. Damage to compressor could result.

Conforms to UL Std. 197 & 471 & NSF/ANSI Std. 4 & 7
