

Specializing in Cafeteria Serving Lines

G.A. SYSTEMS, Inc.

Speedline Merchandise Cabinet

Model D5430 shown.

SPECIFICATIONS

Top is 16 gauge 304 stainless steel #4 finish bound with (4) 10/32 stainless steel screws flush at each end. No exposed screws on the front or back of cabinet. Front and back edges turned down 102 degrees for sleek aesthetics. Corners at precisely 90 degrees for flush alignment to other cabinets. One locking pin at each end to adjoin other G.A. Systems units and for sneeze guard scalability.

Body of cabinet is 20 gauge galvanized trimmed with 20 gauge stainless steel back and end panels. Tubular 1-1/2" square stainless steel tubing frames the cabinet's structure to join the front, back and end panels. Top frame is 1" square cold rolled tubing, bottom frame constructed from 1" square stainless steel tubing and capped.

Front, back and ends trimmed with 22 gauge stainless steel #4 finish trim to accept interchangeable color panels. All NSF approved high pressure laminates are available as well as stainless steel or powder coated finish.

Bottom is fully enclosed. The inside bottom is 18 gauge stainless steel #4 finish. There is a 3.75" clearance from the bottom of the cabinet to the floor.

Plate type 3" swivel non-marking casters with brakes. Cabinets are ADA compliant. Consider dimensions +2" on each side for door and pathway clearance.

Cabinet has two sliding doors with stainless steel, flush mounted handles on front side. Doors are finished with high pressure laminate and slide smoothly on an upper and lower track.
